

RedCos-P Pressure sensor 20 Pa ... 7.500 Pa

Electrical, explosion-proof pressure/differential pressure sensors

24 VAC/DC supply voltage, 0...10 V/(0)4...20 mA analogue output

EC type-approved in acc. with ATEX directive 2014/34/EU for zone 2, 22

Description

The RedCos-P-... pressure sensor generation from ± 100 Pa to ± 7.500 Pa (acc. to type) is a revolution for differential pressure measuring in HVAC systems, in chemical, pharmaceutical, industrial and offshore/onshore plants, for use in hazardous areas zone 2 (gas) and zone 22 (dust).

Highest protection class (ATEX) and IP66 protection, small dimensions, universal functions and technical data guarantee safe operation even under difficult environmental conditions.

All sensors are programmable on site without any additional tools. The measuring ranges are scalable within the maximum ranges. At ...Cos-P-100 the smallest ΔP range is 20 Pa. The analogue output signal is either 0...10 VDC or (0)4...20 mA and can be selected on site. The integrated display is for parametrisation and an actual value indication at working mode (can be switched off as needed).

...Cos-P-...-A sensors are equipped with an additional intrinsically safe (IS) output, e.g. for an external indicator.

...Cos-P-...-OCT and ...-OVA offshore versions are equipped with stainless steel tubing Ø 6 mm.

Highlights

- For all types of gases, mists, vapours and dust for use in zone 2 and 22
- Power supply 24 VAC/DC
- Scalable analogue output, selectable 0...10 V / (0)4...20 mA
- Integrated Ex terminal box
- No additional Ex-i module required
- No intrinsically safe wiring/installation between panel and sensor required
- No intrinsically safe wiring/installation and no space in the panel required
- Optional IS-output (0)4...20 mA for external indicator in Ex-areas
- Display with backlight, can be switched off
- Password locking
- Down to -20 °C ambient temperature applicable
- Compact design and small dimension
- Robust aluminium housing (optional with seawater resistant coating) or in stainless steel
- IP66 protection
- Offshore versions with pressure tube connection for clamping ring Ø 6 mm

Technical data

Supply voltage, frequency	24 VAC/DC $\pm 20\%$ (19,2...28,8 VAC/DC), 50/60 Hz
Current, power consumption	150 mA, ~ 4 W, internal fuse 500 mA, without bracket, not removable
Galvanic isolation	Supply for analogue in- and outputs min. 1,5 kV, supply for relay output min. 1,5 kV
Electrical connection	Terminals 0,14...2,5 mm ² at integrated Ex terminal box, stripping length 9 mm, torque 0,4...0,5 Nm, equipotential bonding 4 mm ²
Cable glands	2 x M16 x 1,5 mm, Ex approved, for cable diameter ~ Ø 5...9 mm
Cable glands ...-CT	2 x M16 x 1,5 mm, Ex approved, brass nickel-plated, for cable diameter ~ Ø 6...10 mm
...-VA, ...-OCT, ...-OVA	2 x M20 x 1,5 mm, Ex approved, brass nickel-plated, for cable diameter ~ Ø 6...13 mm
Protection class	Class I (grounded)
Display	2 x 16 digits, dot-matrix display, backlit, for configuration, user guidance, parameter and actual value indication
Control elements	3 buttons for configuration
Housing material	Aluminium die-cast housing, coated. Optional with seawater resistant coating (...-CT/...-OCT) or stainless steel housing, № 1.4581 / UNS-J92900 / similar AISI 316Nb (...-VA/...-OVA)
Dimensions (L x W x H)	Aluminium housing ~ 180 x 107 x 66 mm, stainless steel housing ~ 195 x 127 x 70 mm (each without connectors)
Weight	~ 950 g aluminium housing, stainless steel version ~ 2,5 kg
Ambient temperature	-20...+50 °C, storage temperature -35...+70 °C
Temperature class	Aluminium housing T6 (T80 °C) at -20...+50 °C Stainless steel housing T5 (T95 °C) at -20...+40 °C, T4 (T130 °C) at -20...+50 °C
Ambient humidity	0...95 % rH, non condensing
Sensor circuit	Internal intrinsically safe (IS) circuit
Sensor	Piezo pressure transmitter
Pressure connection	P+ / P- sleeves Ø 4...6 mm. OCT versions have 2 stainless steel (316L) tube connections for clamp ring fittings Ø 6 mm
Measuring range	± 100 Pa, ± 250 Pa, ± 500 Pa, ± 1.250 Pa, ± 2.500 Pa, ± 5.000 Pa, ± 7.500 Pa in acc. to type Minimum measuring range is 20 % of full range (e.g. 20 Pa at ± 100 Pa sensor)
Response time of sensor	T90 / 5 s
Accuracy of pressure	$< \pm 1\%$ typically, max. $\pm 2\%$ of end value ± 1 Pa
Non linearity and hysteresis	$\pm 0,05\%$ typically, max. 0,25 % of end value
Start delay	5 s
Setting zero point	Via menu. Short-circuit mechanically both tube connectors P+ / P- for the moment of zero point setting
Stability	Long term stability $< 0,2\%$ / year, temperature influence $< 0,02\%$ / K, supply voltage influence $< 0,01\%$
Output	Voltage U [V] or current I [mA], selectable on site via menu, protected against short circuit and external voltage up to 24 V and against polarity reversal
Voltage output U	0...10 VDC adjustable, invertible, burden > 1 k Ω , influence $< 0,05\%$ / 100 Ω
Current output I	0...20 mA adjustable, invertible, burden < 500 Ω , influence $< 0,1\%$ / 100 Ω , open circuit voltage < 24 V
Output in alarm mode	Increasing or decreasing output signal, selectable on site, down to 0 VDC / 0 mA or up to 10 VDC / 20 mA
Wiring diagram	SB 1.0
Scope of delivery	Sensor, 3 self-tapping screws 4,2 x 13 mm resp. in stainless steel (with ...CT and ...VA versions), short circuit tube Cos-P...-A with 1 additional plug for cable Ø 6...8 mm
Parameter at delivery	min./max. pressure range limits (e.g. RedCos-P-100 = -100...+100 Pa), output 4...20 mA, output in alarm mode decreasing to 0 V / 0 mA
...Cos-P...-A	as above and 1 additional intrinsically safe analogue output
Ex-i analogue output	(0)4...20 mA, intrinsically safe (IS), burden max. 400 Ω
Accuracy	$\pm 0,5\%$
Wiring diagram	SB 3.1

Special solutions and accessories

...-CT	Types in aluminium housing with seawater resistant coating, parts nickel-plated
...-OCT	Offshore version in aluminium housing with seawater resistant coating, parts nickel-plated
...-VA	Types in stainless steel housing, parts nickel-plated
...-OVA	Offshore version in stainless steel housing, parts nickel-plated
EXC-RIA-16	LCD indicator (IS) for Ex-/RedCos-... sensors in Ex-zones 1, 2, 21, 22
MKR	Mounting bracket for round ducts up to Ø 600 mm
Kit 2	Flexible pressure tube, 2 m, inner Ø 6 mm, 2 connection nipples
Kit-S8-CBR	2 cable glands M16 x 1,5 mm, Ex-e, brass nickel-plated, for cable Ø 5...10 mm
Kit-Offs-GL-CBR	2 cable glands M20 x 1,5 mm, Ex-d, Ms-Ni, for armoured cables
Kit-PTC-CBR	2 connecting tubes for tube fittings Ø 6 mm, stainless steel 316 L

CSA – Hazardous Location – EMBLEMENTS DANGEREUX

This equipment is suitable for installation in Class I, Division 2, Group A, B, C, D hazardous locations or nonhazardous locations only.
CET ÉQUIPEMENT EST SEULEMENT APPROPRIÉ À L'INSTALLATION DANS LA CLASSE I, DIVISION 2, GROUPES A, B, C, D DES EMBLEMENTS DANGEREUX OU DES EMBLEMENTS NON DANGEREUX.

WARNING – EXPLOSION HAZARD:
Substitution of components may impair suitability for Class I, Division 2.
AVERTISSEMENT – RISQUE D'EXPLOSION :
LA SUBSTITUTION DE COMPOSANTS PEUT RENDRE CE MATÉRIEL INACCEPTABLE POUR LES EMBLEMENTS DE CLASSE I, DIVISION 2.

WARNING – EXPLOSION HAZARD:
Do not connect or disconnect this equipment unless power has been removed or the area is known to be nonhazardous.
AVERTISSEMENT – RISQUE D'EXPLOSION :
NE PAS BRANCHER OU DÉBRANCHER TANT QUE LE CIRCUIT EST SOUS TENSION, À MOINS QU'IL NE S'AGISSE D'UN EMBLEMENT NON DANGEREUX.

RedCos-P... en
V02 – 4-Jul-2016

Electrical connection

All sensors require a 24 VAC/DC power supply. The electrical wiring must be realized via the integrated terminal box acc. to ATEX.

Attention: Before opening the terminal box cover, the supply voltage must be shut off! The supply has to be connected at terminals 1 (-/~) and 2 (+/~), the analogue output at terminals 3 (mA/V) and 4 (GND).

The optional analogue output at ...Cos-P...-A is intrinsically safe. Note the maximum connection values of intrinsically safe parameters (see table below).

RedCos-P...

SB 1.0

Intrinsically safe parameters (IS) – Internal pressure sensor

$U_o = 7.9 \text{ V}$ $C_i \rightarrow 0$
 $I_o = 48 \text{ mA}$ $L_i \rightarrow 0$
 $P_o = 95 \text{ mW}$

	IIC	IIB	IIA
L_o	2 mH	5 mH	10 mH
C_o	1.3 μF	5.8 μF	7.1 μF

Internal sensor IS values are corresponding to the internal pressure sensor. Due to the matter of fact that there is no external sensor connected, these IS values are not relevant for the customer but shown for the sake of completeness.

Ex-i output (IS) (optional)

– RedCos-P...-A

Connector and terminals

SB 3.1

Female connector

Male connector

to connect e.g.
an external LCD indicator (IS)

Intrinsically safe parameters (IS) – Analogue Ex-i output

$U_o = 15.8 \text{ V}$ $C_i \rightarrow 0$
 $I_o = 85 \text{ mA}$ $L_i \rightarrow 0$
 $P_o = 336 \text{ mW}$

	IIC	IIB	IIA
L_o	2 mH	5 mH	10 mH
C_o	0.33 μF	1.6 μF	1.8 μF

Zero point compensation

...Cos-P... pressure sensors are equipped with a zero point compensation to adjust the module to the installation position. The pressure nipples P+ / P- must be connected with a short circuit tube and the zero point compensation performed by following the menu for parametrisation (menu 18).

Before starting the zero point compensation, the device should be connected to power supply for a minimum of 15 minutes to reach the uniform working temperature!

Display, buttons and parameters

Change operation – parametrisation mode

To change from operation to parametrisation mode and vice versa, push ENTER button for minimum of 3 seconds. Back to operation mode with menu "save".

Indication of data logging

A flashing star in the display shows that data is received and the device is working.

Password input

The default/delivery setup is 0000. In this configuration the password input is not activated. To activate the password protection (menu 20) change the 4 digits into your chosen numbers (e.g. 1234) and press ENTER.

Please keep your password in mind for next parameter change! Due to a new parameter setup the password is requested.

Important information for installation and operation

A. Installation, commissioning, maintenance

All national and international standards, rules and regulations must be complied with. Certified apparatus must be installed in accordance with manufacturer instructions. If the equipment is used in a manner not specified by the manufacturer, the safety protection provided by the equipment may be impaired. For electrical installations design, selection and erection, EN/IEC 60079-14 can be used.

Canada: Install per Canadian Electrical Code (CEC).

USA: Install per National Electrical Code (NEC).

Attention: Apply all Ex rules and regulation before opening the internal terminal box. Do not open cover when circuits are live!

Draw the wiring cables through the cable glands. For connection use the internal Ex terminal box and connect equipotential bonding.

After connection install the cables in a fixed position and protect them against mechanical and thermal damage. Close all openings and ensure IP protection (min. IP66).

Avoid temperature transfer and ensure not to exceed max. ambient temperature! For outdoor installation a protective shield against sun, rain and snow should be applied. After mounting and installation a zero point compensation must be done to ensure correct measurement results (see description).

Sensors are maintenance free. An annual inspection is recommended. For electrical installations inspection and maintenance, EN/IEC 60079-17 can be used.

Clean with damp cloth only.

Ex sensors must not be opened and repaired by the end user.

B. Long cabling

We recommend using shielded signal wires and to connect one end of the shield to the ...Cos-... terminal box.

C. Separate ground wires

For supply and signal wires use separate grounds.

Parametrisation and commissioning

To change from operation to parametrisation mode push the "ENTER" button for minimum 3 seconds.
If password protected: type password and push .
Back over to menu "Save" and exit.

Operation → Parametrisation
push for min. 3 s

Example: Menu language English
Range -25...+25 Pa
Output 4...20 mA
Output Ex-i 0...20 mA

Menu	Function	ENTER	Indication	Select	ENTER	Next indication	Select	ENTER	Next menu
